

TRI-HOSPITAL DREAM LOTTERY BACK TO BENEFIT MANITOBANS

Working Together for Better Care: The foundations of Health Sciences Centre Winnipeg, Children's Hospital-HSC Winnipeg, and St. Boniface Hospital launch Manitoba's largest hospital lottery yet

May 2, 2018 – Winnipeg, MB – Three of Manitoba's biggest hospital foundations have teamed up again to help patients in need while offering the biggest grand prize options ever in Manitoba hospital lottery history. The Health Sciences Centre Foundation, Children's Hospital Foundation of Manitoba, and St. Boniface Hospital Foundation are launching the 2018 Tri-Hospital Dream Lottery today, to make a significant impact on health care in Manitoba.

"With our three hospital foundations working together, we can achieve more for the greater good - delivering the best possible patient care," says Gary Rozak, Interim President & CEO, Children's Hospital Foundation of Manitoba. "Patients like our Champion Child Abigail, who at only age four needed a very high level of specialized equipment as she fought a disease that caused her white blood cells to eat away at her bones. Now 11-years-old, Abigail is in remission and living like someone so young should. Thanks to lottery supporters, miracles like Abigail's are made possible."

"Thanks to support from generous Manitobans, including through our lottery program, our three hospital foundations have a tremendous impact on the quality of care we provide to families," says Vince Barletta, President and CEO, St. Boniface Hospital Foundation. "Whether it's a family in crisis, a premature baby in need of the latest technology, an organ transplant, or a family member undergoing life-saving surgery - you can depend on us."

"We're proud to continue this collaboration that supporters asked us for," says Jonathon Lyon, President & CEO of the Health Sciences Centre Foundation. "By joining forces, we can help more patients than we ever could alone, while offering Manitobans the chance to win some of the best lottery prizes ever seen in the province."
