

Say, "Yes!" to tripling your impact this season!

Hearing directly from grateful patients, physicians, researchers, and others at St. B is a powerful way to celebrate the incredible impact your kindness has had on them. That was the idea behind our *Voices of Hope* fundraising campaign this season.

You can watch our *Voices of Hope* videos today at bealifeline.ca (where you can also choose to give online – turn over for the QR code) to hear from those who know about your impact, in their own words.

You will feel great hearing first-hand about the difference you have made. We want that feeling to be 3x stronger for you this time! That is why we are matching your gift to triple your impact, up to \$250,000 if made before December 31.

Voices of Hope lets you hear from Kelly and Corey Burtnyk (below left), who explain how your support of St. Boniface Hospital's Neonatal Intensive Care Unit (NICU) saved their premature baby Annie's life.

"The NICU was not a place we wanted to be, but let me tell you, we were so thankful it was there when our family needed it," said Kelly.

**Voices
of Hope**

(Continued on reverse)

Voices of Hope lets you hear directly from the Burtnyk family, Dr. Michel Aliani, and others.

Every dollar you give this season will become three, making your gift work 3x as hard for researchers like Dr. Michel Aliani, Principal Investigator of Nutritional Metabolomics Research in the Division of Neurodegenerative Disorders at the Hospital.

Through *Voices of Hope*, Dr. Aliani tells you in his own words about his research into the nutritive qualities of yellow peas. "The healthier the food we consume, the healthier we are as a society," he said.

Add your voice and speak up for the program or area at St. B that means the most to you.

Sincerely,

Karen Fowler, CFRE
President and CEO, St. Boniface Hospital Foundation

To triple your impact, we are matching your gift, and all gifts, up to \$250,000. Act before December 31 to get your 2024 tax receipt!

Your dollar will work 3x harder for the best compassionate care and most innovative medical research until the end of this year, thanks to our generous *Voices of Hope* matching donors.
